PROJECTS

RENTABLE

GitHub Repo - https://github.com/sahasra101/project2

Deployed - https://mighty-lake-82037.herokuapp.com

An application that calculates return on investment on rental properties. Designed for beginners entering the real estate market. This app leverages Zillow and Google Maps API. Test login: test@email.com - thisisatest

ONLY THE HITS

GitHub Repo – https://github.com/pierrelampre/onlythehits

Deployed - https://pierrelampre.github.io/OnlyTheHits/

An application that leverages Spotify and BandsInTown API. It generates five similar artists from user input and helps them build a playlist of new music.
